

## Installation guide for the Payson module to Magento

Start with downloading the latest version of Magento, when you have finished the installation of Magento then it is time to start the download and installation of the Payson module.

The Payson module can be found on the following page:

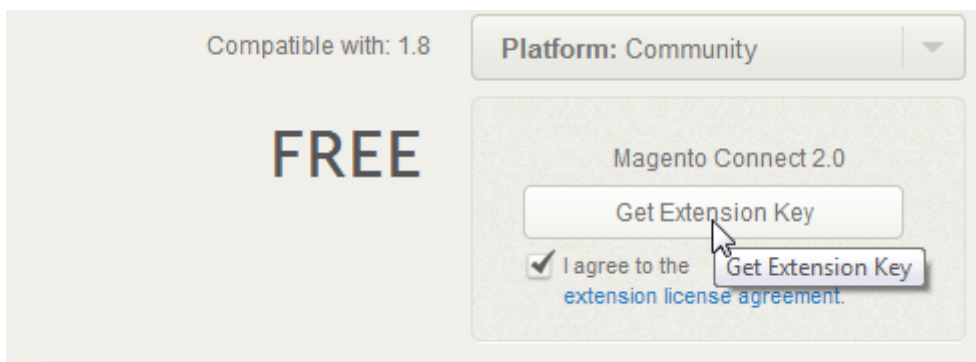

<http://www.magentoocommerce.com/magento-connect/payson-2617.html>

When you have entered that page you should then see a page that looks like the image below, here you need to be logged in to be able to download our extensions to Magento. Click on the Install button.

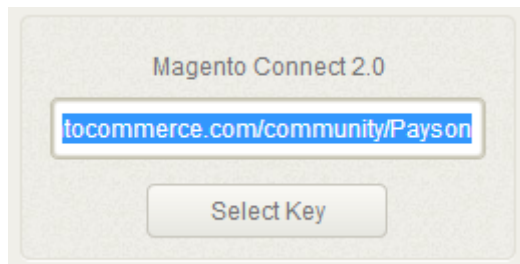

The screenshot shows the Magento Connect page for the Payson module. On the left is a large image of the Payson logo with the tagline "One contract One integration" and logos for Handelsbanken, SEB, Nordea, Swedbank, VISA, and Mastercard. To the right of the image, the word "Payson" is displayed in orange. Below it are five stars and a button that says "Write the first review". Further right is a "225 Popularity Score" with a flame icon. Below the stars is a link that says "Follow this extension". A description states: "Official Payson module for Magento. Use this to be able to handle invoice, card and direct bank transfers." Below the description, it says "Compatible with: 1.8" and "Platform: Community" with a dropdown arrow. A large "FREE" label is shown next to a blue "Install Now" button. A tooltip over the button says "This will install the latest version." Below the "Install Now" button is a checkbox labeled "I agree to the extension license agreement." and a "Get Extension Key" button.

Check the Checkbox that you agree with the license agreement, then click on Get Extension Key

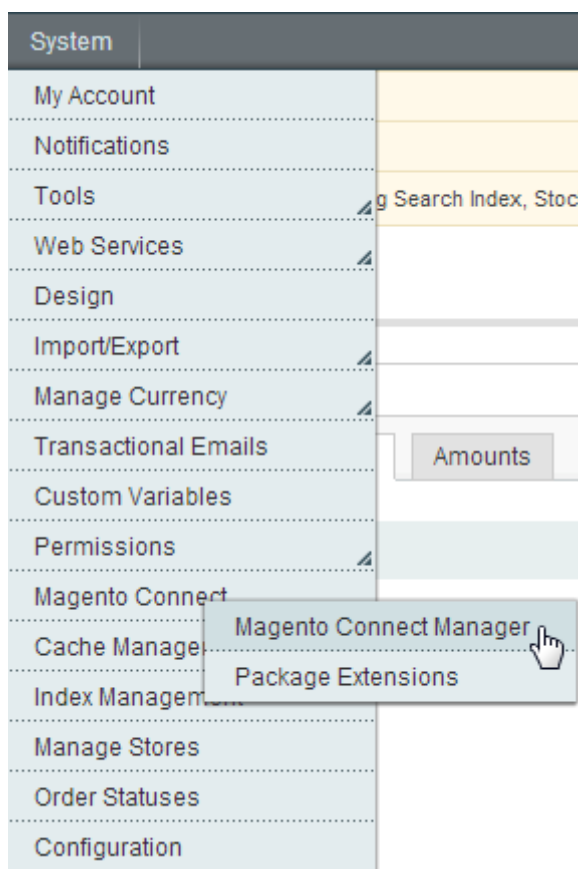

This screenshot is a close-up of the bottom section of the page. It shows the "Compatible with: 1.8" and "Platform: Community" dropdown. Below these is a large "FREE" label. To the right, under the heading "Magento Connect 2.0", there is a "Get Extension Key" button. Below this button is a checkbox that is checked, with the text "I agree to the extension license agreement." next to it. Another "Get Extension Key" button is positioned to the right of the checkbox.

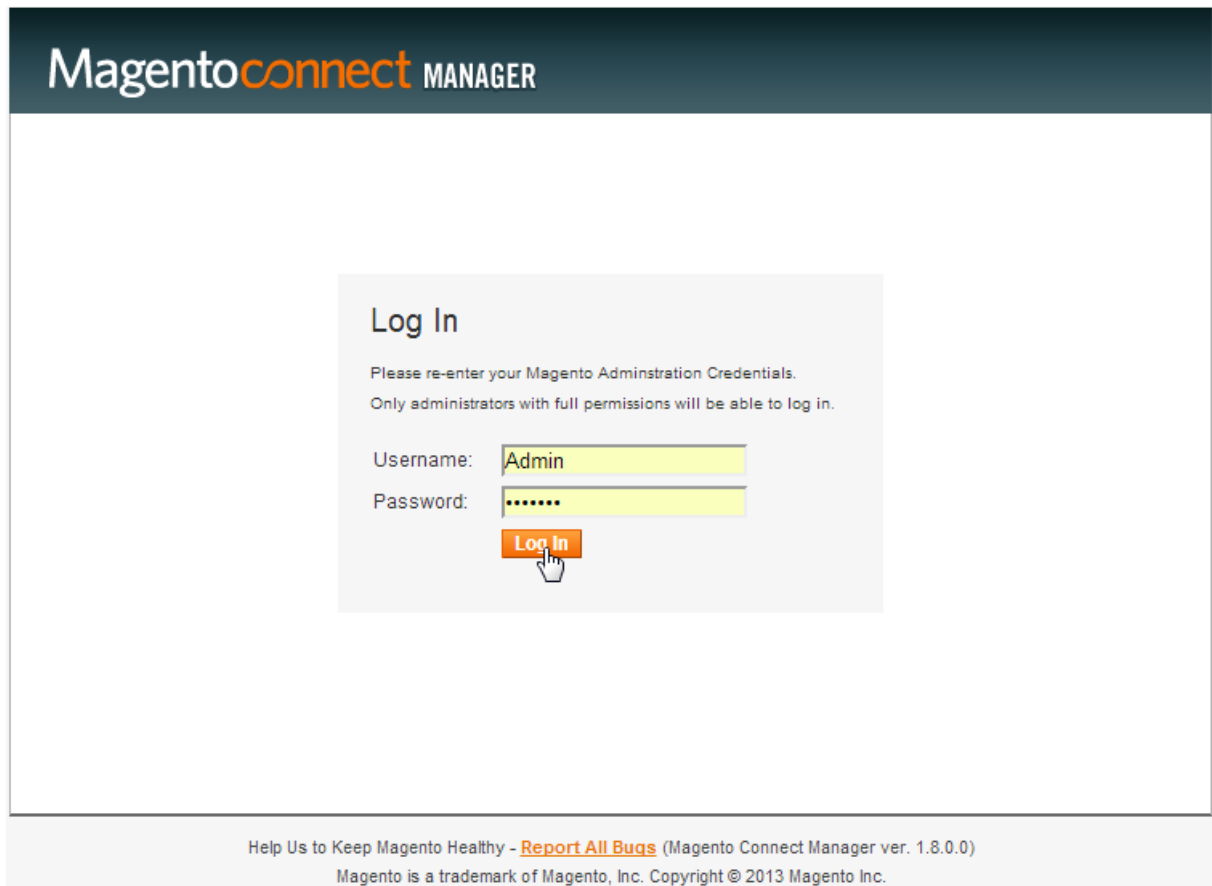

Click on Select Key, then copy the link address.

Now we leave this page and instead choose open up our newly installed Magento store, where we choose to enter into the admin pages. When you are logged in as admin, here you hover over the system tab search in this tab for something called Magento Connect there you can select Magento Connect Manager in a submenu.

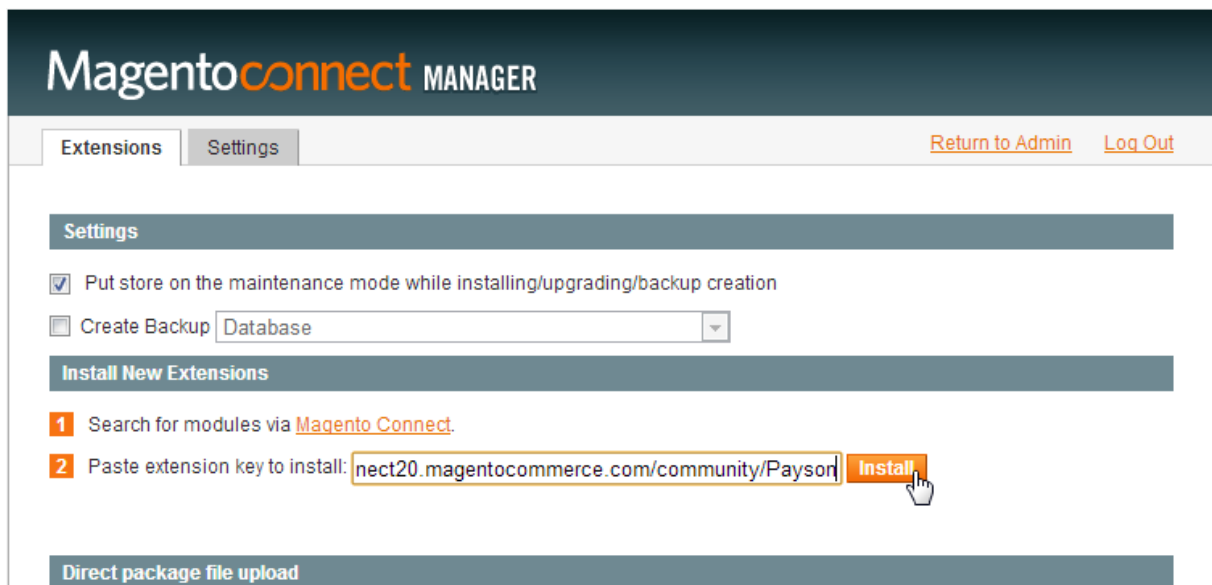

You should now see the page as in the image below, here you enter your admin credentials.

The screenshot shows the Magento Connect Manager login interface. At the top, there is a dark blue header with the text "Magentoconnect MANAGER" in white. Below the header, the main content area is white. In the center, there is a light gray box titled "Log In". Inside this box, there is a message: "Please re-enter your Magento Administration Credentials. Only administrators with full permissions will be able to log in." Below the message, there are two input fields: "Username:" with the value "Admin" and "Password:" with a masked password "\*\*\*\*\*". Below the password field, there is an orange "Log In" button with a hand cursor icon pointing to it. At the bottom of the page, there is a light gray footer with the text: "Help Us to Keep Magento Healthy - [Report All Bugs](#) (Magento Connect Manager ver. 1.8.0.0) Magento is a trademark of Magento, Inc. Copyright © 2013 Magento Inc."

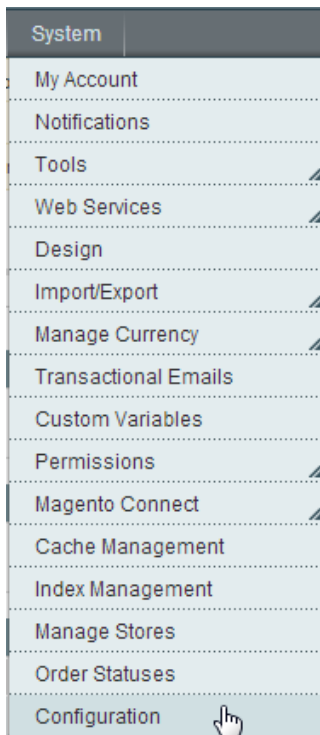

In the page that follows when you have entered the correct credentials it should look as the picture below. Under the headline Install New Extension is where you should paste the link that we collected earlier. Then Click on Install.

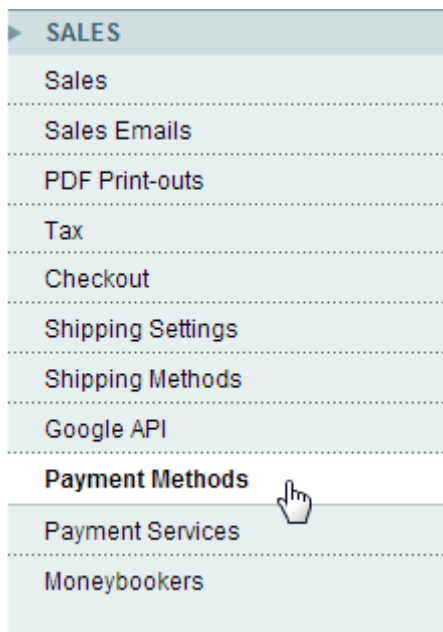

The screenshot shows the Magento Connect Manager Extensions page. At the top, there is a dark blue header with the text "Magentoconnect MANAGER" in white. Below the header, there is a navigation bar with two tabs: "Extensions" (selected) and "Settings". To the right of the tabs, there are two links: "Return to Admin" and "Log Out". Below the navigation bar, there is a section titled "Settings" with a blue header. Under this section, there are two checkboxes: "Put store on the maintenance mode while installing/upgrading/backup creation" (checked) and "Create Backup" (unchecked). Below the "Create Backup" checkbox, there is a dropdown menu with the value "Database". Below the "Settings" section, there is a section titled "Install New Extensions" with a blue header. Under this section, there are two numbered steps: "1 Search for modules via [Magento Connect](#)." and "2 Paste extension key to install: ". To the right of the input field, there is an orange "Install" button with a hand cursor icon pointing to it. Below the "Install New Extensions" section, there is a section titled "Direct package file upload" with a blue header.

Click on the button commit changes, and then on the link Return to Admin.

When you are back in the admin pages we can start to configure and setup our module. Go to the System tab again and this time select Configuration.

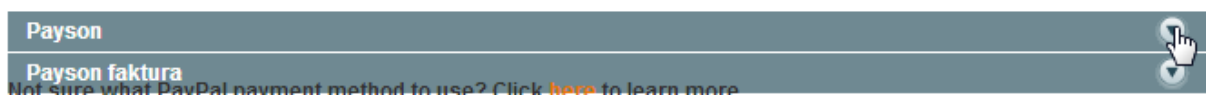

On the left side look for the headline Sales and then click on Payment Methods

You should now see among others also our two module “Payson” and “Payson faktura”, the latter is Payson Invoice.

## Payment Methods

Save Config

Of course you only need to install the payment options that are available for your store. In the configuration below we have input the values for our test server, you shall of course switch these values to your own that you have received from Payson. When you are done click on Save Config.

## Payment Methods

Save Config

Save Config

Payson		
Test mode	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Enable/disable test mode.		
Enabled	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Enable/disable payment with Payson.		
Email	<input type="text" value="testagent-1@payson.se"/>	[GLOBAL]
▲ Email address bound to your Payson account.		
Agent ID	<input type="text" value="4"/>	[GLOBAL]
▲ Agent ID is found on your Payson profile page.		
MD5 key	<input type="text" value="2acab30d-fe50-426f-90d7-8c60a7eb31d4"/>	[GLOBAL]
▲ MD5 key is found on your Payson profile page.		
Please select the payment method	<input type="text" value="CREDITCARD / BANK"/>	[STORE VIEW]
▲ Pay with Payson (Visa, Mastercard or Internetbank)		
Restore cart on cancel	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Restore cart when customer cancel the payment		
Restore cart on error	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Restore cart when status from Payson is error		
Show receipt page	<input type="text" value="Yes"/>	[GLOBAL]
▲ Here you can enable or disable our receipt page		

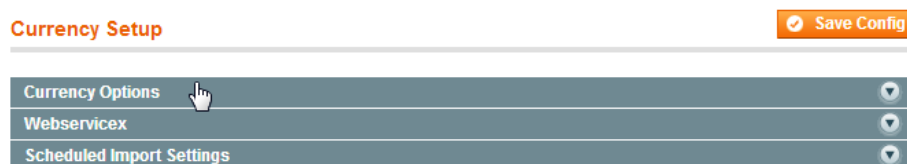

Payson invoice		
Payson Invoice requires a separate contract. Please contact Payson for more information <a href="#">Click here</a>		
Enabled	<input type="text" value="Yes"/>	[STORE VIEW]
▲ Enable/disable invoice payment with Payson.		
Invoice fee tax	<input type="text" value="None"/>	[STORE VIEW]
▲ Tax class for invoice fees.		
Invoice fee (SEK)	<input type="text" value="25"/>	[STORE VIEW]
▲ Invoice fee for SEK excluding tax.		
Invoice fee (EUR)	<input type="text" value="3"/>	[STORE VIEW]
▲ Invoice fee for EUR excluding tax.		

In the next and final step it is time to install the currency that you will be using. I will show how you should install the Swedish krona, but feel free to install something else just remember that the Payson module only supports with Euro or Sek.

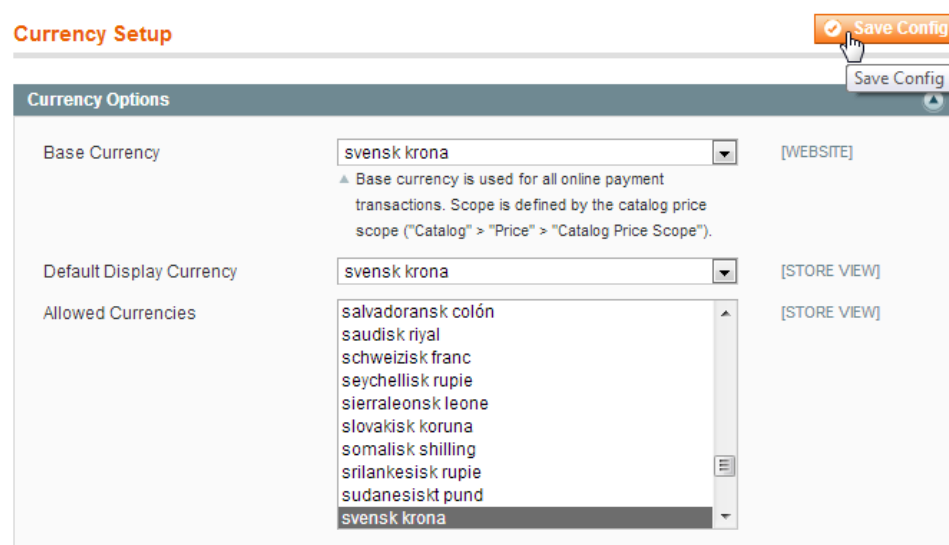

Under the headline General in the configuration page click on Currency Setup.

Then click on the currency options

Now you only need to search for the your choice of currency in the drop lists, and then click on Save Config

Now all the fundamental steps has been done to get our module to work.

Good luck with your new online store

With regards

Payson Integration
